

Further investments in quality management

For TAS Schäfer GmbH quality and reliability are the most important things. In order to be able to achieve an even better quality in the future, TAS Schäfer GmbH continued to invest in quality management.

At the 30th of November 2016 the expansion of the own measuring center was completed. In addition to expanding the hall, the company also invested in a further measuring machine in order to meet the high demands on quality. In addition to its own quality control within the manufacturing process, the new measuring hall will also be used for the further development of own products as well as for research-projects. First projects (in cooperation with two universities) have already started in 2016.

"It is always fruitful to optimize and to improve things without need. A well-organized quality management ensures customer relationships and the own position in the market. Our customers trust in the TAS Schäfer-quality." With this guiding principle, CEO Udo Schäfer opened the new rooms on the 30th of November 2016.
